

# LIGHT TO LIVE BY: Bible reading plan

The benefits and distinctives to this plan:

- Read the Bible twice over two years.
- Focus on one book at a time allowing you to properly study each book and not rush over certain books. (And slowly read through Proverbs each day)
- Alternate between OT and NT books.
- Read the OT books in order to fit the historical storyline of the Bible. (Wisdom books are one exception to this)
- Read each book as a whole, as each author intended.
- Readings are split according to the structure of the book so that you don't stop reading halfway through a section.
- Each month has different types of reading allowing you to study the Bible in different ways. First you will read the entire book, then section by section and then self-allocated focused readings of a few verses are recommended in the spare days (or you could every day).
- The overview days, allow you to quickly read the entire book of the Bible, to see connections you will miss when you read it slowly. (Most books were written to be read like this)
- In-depth studying is encouraged by going through books with heavier content at a slightly slower pace.
- Each month has 25 readings leaving about 5 spare days for catching up, extra time to do the overview reading of each book or deeper studying of passages.
